

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

**Edson on the Birds of Chataqua County, N. Y.**—In a brochure\* of 14 pages Mr. Edson gives an annotated list of 150 species, embracing only such as have come under his own notice during several years of observation in the central part of the County. The author says that many others might doubtless have been added with safety, but he commendably refrains from including them till he can add them authoritatively. The list consequently includes, in the main, only the more common species. Unfortunately the list is greatly marred by typographical errors, for which, however, the author cannot be held responsible, it having been printed, as we are informed, without his revision of the proofsheets. It would be hard to find a worse specimen of printing in respect to the technical names of the species.—J. A. A.

**Shufeldt on the Osteology of *Conurus carolinensis* and *Geococcyx californianus*.**—In a paper† of nearly twenty pages accompanied by two beautiful plates, Dr. Shufeldt has given us another memoir on the osteology of American birds, this time treating of the Carolina Paroquet, a form doubtless soon to be added to the list of species exterminated by man's agency. Besides giving a detailed description of the bones of the skeleton, he adds a convenient synopsis of the skeletal characters of the species.

A second paper‡ of similar character deals with the Road-runner, and is illustrated by three excellent plates. It is needless to say that both papers are valuable contributions to avian osteology.§—J. A. A.

**Publications Received.**—Allen, J. A. (1) A Revised List of the Birds of Massachusetts. (Bull. Am. Mus. Nat. Hist., I, No. 7, pp. 221-271.) (2) The Masked Bob-white (*Colinus ridgwayi*) of Arizona, and its Allies. (*Ibid.*, pp. 273-290, pl.)

Blasius, W. Beiträge zur Kenntniss der Vogelfauna von Celebes, II. (Zeitsch. für die ges. Orn., 1886, Heft. II.)

Blasius, R., J. Rohweder, R. Tancre, and A. Walter. IX. Jahresbericht (1884) des Ausschusses für Beobachtungsstationen der Vögel Deutschlands. (Journ. für Orn., Jahrg. 1886, April-Heft.)

Edson, John M. Birds of Chataqua County, N. Y., 1886, pp. 14. (Jamestown, 1886, Geo. H. Tiffany.)

---

\* Birds of Chataqua County. An Address delivered before the Chataqua Society of History and Natural Science, at its semi-annual meeting held in Jamestown, January 29, 1885. By John M. Edson. Jamestown: Geo. H. Tiffany, 1886. Large 8vo pp. 14.

† Osteology of *Conurus carolinensis*. By R. W. Shufeldt, M.D., Medical Corps U. S. Army [etc.]. < Journ. of Anat. and Phys., Vol. XX, pp. 407-425, pll. x, xi.

‡ The Skeleton in *Geococcyx*. By R. W. Shufeldt, Med. Dept. U. S. Army [etc.]. < Journ. Anat. and Phys., Vol. XX, pp. 244-266, pll. vii-ix.

§ We notice that in our copy of the paper on *Conurus carolinensis* the author has corrected the description of the plate to read *right* pectoral limb, and right humerus instead of left, respectively, as printed.
